

AMENDED

No 47367

APPLICATION FOR PERMIT

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of filing in State Engineer's Office. ~~OCT 28 1983~~ NEW PRIORITY DATE: MAR 20 1992  
 Returned to applicant for correction. DEC 7 1983  
 Corrected application filed. DEC 20 1983  
 Map filed. DEC 20 1983 under 47366

The applicant. Geothermal Development Associates

251 Ralston Street

, of Reno

Street and No. or P.O. Box No.

City or Town

Nevada 89503

State and Zip Code No.

, hereby make <sup>s</sup> application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.) November 28, 1978, Nevada

1. The source of the proposed appropriation is ground water  
Name of stream, lake, spring, underground or other source
2. The amount of water applied for is 3.0 second-feet  
One second-foot equals 448.83 gals. per min.  
 (a) If stored in reservoir give number of acre-feet
3. The water to be used for geothermal power  
Irrigation, power, mining, manufacturing, domestic, or other use. Must limit to one use.
4. If use is for:
  - (a) Irrigation, state number of acres to be irrigated:
  - (b) Stockwater, state number and kinds of animals to be watered:
  - (c) Other use (describe fully under "No. 12. Remarks") geothermal power generation
  - (d) Power:
    - (1) Horsepower developed
    - (2) Point of return of water to stream
5. The water is to be diverted from its source at the following point: From a well within the NE $\frac{1}{4}$  SE $\frac{1}{4}$   
Describe as being within a 40-acre subdivision of public  
of said Sec. 29, T 18 N., R. 20 E., M.D.M, Nev. on a tangent 996.00', bearing  
survey, and by course and distance to a section corner. If on unsurveyed land, it should be so stated.  
N30°09'00"E, to the East  $\frac{1}{4}$  corner of said Sec. 29.
6. Place of use Portions of SE $\frac{1}{4}$ , NE $\frac{1}{4}$ , SW $\frac{1}{4}$  NE $\frac{1}{4}$ , and NE $\frac{1}{4}$  SE $\frac{1}{4}$  Sec. 29, T. 18N.,  
Describe by legal subdivision. If on unsurveyed land, it should be so stated.  
R. 20 E., M.D.B. & M., Nevada
7. Use will begin about January 1 and end about December 31, of each year.  
Month and Day Month and Day
8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) Drilled well and collection system.  
State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with pump and motor, etc.
9. Estimated cost of works. \$140,000

10. Estimated time required to construct works..... Three years  
If well completed, describe works.

11. Estimated time required to complete the application of water to beneficial use..... Three years

12. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use.

This well will be one of two or more geothermal production wells having a total diversion of up to eight (8) cfs; consumptive use will be about 1.6 cfs in the power plant evaporative cooling system (1065 ac-ft per year); the balance (6.6 cfs) will be reinjected into the geothermal reservoir by means of injection wells.

APPROVAL

OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of geothermal fluid herein granted is only a temporary allowance and that the final right obtained under this permit will be dependent upon the amount actually placed to beneficial use. It is also understood that this right must allow for a reasonable decrease of fluid pressure and heat. The well shall be equipped and maintained to prevent any waste of the geothermal fluid. Accurate measurements must be kept of discharge of the production well and the amount of fluid injected into the injection well to determine the total amount of fluid consumed for a beneficial use.

The production and injection well are to be cemented from the producing levels to the surface to protect fresh water zones. This permit is issued subject to the condition that only geothermal fluids are to be diverted and used beneficially for heating purposes and fresh, cold water aquifers are not to be diverted. The used geothermal fluids are to be returned to the source via the injection well. The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies. A detailed log on the injection well and/or other analyses of the system used for returning the used geothermal fluids to the source must be submitted together (CONTINUED ON PAGE 2)  
 The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and

not to exceed..... 3.0 ..... cubic feet per second.....

Work must be prosecuted with reasonable diligence and be completed on or before..... January 8, 1987

Proof of completion of work shall be filed before..... February 8, 1987

Application of water to beneficial use shall be made on or before..... January 8, 1990

Proof of the application of water to beneficial use shall be filed on or before..... February 8, 1990

Map in support of proof of beneficial use shall be filed on or before.....

Completion of work filed FEB 6 1987

IN TESTIMONY WHEREOF, I, PETER G. MORROS  
 State Engineer of Nevada, have hereunto set my hand and the seal of

Proof of beneficial use filed.....

my office, this 8TH day of JANUARY,

218 (Rev.)

CANCELLED APR 13 1992

BECAUSE OF FAILURE  
 OF PROVISIONS OF PERMIT

STATE ENGINEER

## (PERMIT TERMS CONTINUED)

with the Proof of Completion.

An annual report for this well must be filed under this permit describing the amount of geothermal fluid consumed to a beneficial use for the calendar year. This report must also detail the amount of fluid produced and injected.

The total combined diversion rate under Permits 47366, 47367, 47368, 47369 and 47370 is limited to 8.0 cubic feet per second.

Permits 47366, 47367, 47368, 47369 and 47370 are issued subject to the terms and conditions set forth in the ruling of the State Engineer on October 30, 1984.

The total withdrawal of the geothermal fluid shall be limited to 5,792 acre-feet per year but the total consumptive use of the geothermal fluid is limited to only incidental fluid losses in the system and in no case shall it amount to more than 10% of the volume withdrawn annually. The State Engineer does not waive the right to make a determination of incidental fluid losses at any time and impose additional conditions thereto. This permit is further issued subject to the provisions of NRS 533.372(1) and with the understanding that the power or energy generated by the beneficial use of this water or steam is subject to recapture and use within the boundaries of the State of Nevada when the need arises.
